### **DETAILED ACTION**

The amendments to claims filed January 11, 2007 is acknowledged. Claims 7-14, 18-20, 23-24 and 26-27 are currently amended. Claim 28\* (referred to as 29) is newly added. \*Please note that there are 2 claims numbered 28, original and new\*. Claims 1-6 have been canceled. Upon further review and consideration, a new restriction is required.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 7-17 and 26-27 in part, 28 and 29\*, are drawn to a JEV cDNA and a vector including the JEV cDNA.

Group II, claim(s) 26-27 in part, are drawn to elements from the cDNA of JEV.

Group III, claim(s) 18-21, are drawn to an infectious JEV RNA transcript and a cell transfected with the JEV RNA transcript.

Group IV, claim(s) 22-23, are drawn to a synthetic JEV.

Group V, claim(s) 24-25, are drawn to a method for the expression of heterologous genes.

The inventions are independent or distinct, each from the other because:

Group I is drawn to a JEV RNA which is structurally different from a JEV cDNA in

Group II. Group III is drawn to a JEN RNA transcript which is structurally different from a

Art Unit: 1648

synthetic JEV in Group IV. Groups I-IV are all structurally different and have different modes of action and utility. Group V is drawn to a method for expressing genes, which has a different mode of action and effect than Groups I-IV.

If Group I is elected a restriction to one of the following is also required under 35 U.S.C.

121. Because the claims contain patentably distinct inventions, election is required of **one** sequence.

SEQ ID NO: 43

SEQ ID NO: 44

SEQ ID NO: 45

SEQ ID NO: 46

SEQ ID NO: 47

SEQ ID NO: 48

The inventions are independent or distinct because each sequence is a different structure and requires a separate search.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1648

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
